BALOCHISTAN RESIDENTIAL COLLEGE ZHOB

Integrated Website & College Management System

GOOGLE AI STUDIO - BUILD BLUEPRINT

A complete implementation handoff for a PHP + MySQL project built with XAMPP.

PROJECT TARGET Complete working application	TECHNOLOGY XAMPP / Apache / PHP / MySQL
ACCESS MODEL Public-first, optional login	PORTALS Admin / Teacher / Cadet / Parent
APPROVED VISUALS 12 individual page mockups	DEPLOYMENT Local first, then online hosting

DESIGN DIRECTION

Deep maroon and burgundy, premium gold, warm cream/ivory surfaces, the original BRC crest, a subtle emblem watermark, and reduced-transparency glassmorphism. Glass cards must remain mostly opaque (about 88-96% surface opacity) so text is readable.

1. HOW TO USE THIS HANDOFF

Attach this PDF, the separate master prompt TXT, the database SQL file, and the original logo JPG to Google AI Studio or another coding agent. If the tool cannot accept several files, attach this PDF and paste the full text prompt into its chat. The SQL file can be pasted or imported as a separate project asset.

Approved individual visual references

No.	Page	Approval state
01	Homepage	Approved by project owner
02	Online Admission	Approved by project owner
03	Alumni Registration	Approved by project owner
04	Login / Sign In	Approved by project owner
05	Admin Dashboard	Approved by project owner
06	About Us	Approved by project owner
07	Principal's Profile	Approved by project owner
08	Academics	Approved by project owner
09	Faculty & Staff	Approved by project owner
10	Hostel Life	Approved by project owner
11	Results	Approved by project owner
12	Gallery	Approved by project owner

Confirmed owner decisions

- Develop locally in XAMPP, then prepare for online hosting.
- English for the initial release; make future Urdu localization possible.
- Admissions are online and must support boys and girls.
- Visitors see the public homepage first; login is optional.
- Use one central MySQL database for all public and private modules.

Not yet individually designed

- Notices & Announcements and Contact Us: implement in the approved design language; create a page design before launch if required.
- Teacher, Cadet and Parent portals: original screenshots are supplied as reference; implement complete portal route systems, and create detailed mockups where useful.
- Admin management sub-pages: Dashboard is approved, but each CRUD/review/report/settings page still needs real implementation.
- Supporting screens include Forgot/Reset Password, Application Tracking, Notice Detail, Gallery Album, Result Detail, 403/404 and printable reports.

Do not claim all pages are individually approved simply because a collage exists. The collage is only a visual index; the individual page screenshots in this PDF are the authoritative design references.

2. DESIGN SYSTEM - NON-NEGOTIABLE

Every public page and portal must look like one coherent BRC Zhob product. Match the composition, hierarchy, section order, spacing, card density and visual balance of the approved screenshots, while building real responsive HTML components rather than using screenshots as page backgrounds.

Token	Suggested value	Usage
Maroon 950	#3E080D	Deep backgrounds / footer base
Maroon 900	#540B12	Primary shells / header
Maroon 800	#720F19	Primary buttons / panel accents
Maroon 700	#8D1722	Active menu / focus emphasis
Gold 500	#D5A83D	Icons, borders, CTAs
Gold 300	#F0D18A	Highlights / soft gold
Cream 50	#FFFDF8	Main content surfaces
Cream 100	#F7F0E5	Secondary backgrounds
Ink	#23191A	Primary body text
Muted	#71676A	Secondary labels

Logo and watermark rules

- Use the supplied official BRC logo unchanged. Do not recreate it with AI, recolor it, crop key elements or substitute another crest.
- Place a faint logo watermark in selected hero/background/card areas only; keep it away from dense text. Suggested opacity 4-10%.
- Keep glass panels mostly opaque (about 88-96% surface opacity), with only subtle blur; avoid excessive transparency.
- Use one consistent icon family such as Bootstrap Icons or Font Awesome Free. Do not use emoji as interface icons.
- Responsive widths to verify: 1440, 1024, 768, 390 and 360 px. No horizontal overflow.

Reusable components

PublicHeader, PublicFooter, HeroBanner, PublicSidebar, PortalShell, GlassPanel, StatCard, FeatureCard, ProfileCard, NoticeCard, DataTable, SearchBar, FilterTabs, StatusBadge, Stepper, FileUpload, EmptyState, ConfirmDialog, Toast, Pagination, FormField.

3. SYSTEM ARCHITECTURE & PAGE ARRANGEMENT

The public website and four private portals form one integrated PHP application. Every module reads/writes the same normalized database, while server-side permissions control who can see or modify records.

Layer	Responsibilities
Browser / UI	Responsive public pages, role portal shells, accessible forms, tables, filters, charts, file inputs and navigation.
Apache / Front Controller	All requests enter through public/index.php and a named route registry.
Middleware	Session, CSRF, authentication, role, permission, ownership, rate limits and validation.
Controllers / Services	Controllers coordinate HTTP requests; services handle admissions, alumni, attendance, grading, fees, uploads, notifications and backups.
Models / PDO	Prepared SQL queries, transactions and database relationships. No SQL in templates.
MySQL / MariaDB	Single database brc_zhob_db with InnoDB, utf8mb4, indexes and foreign keys.
Private storage	Uploaded documents, logs, exports and backups stored outside public web root and served only through authorization.

Request lifecycle

Browser → Apache rewrite → public/index.php → Router → Session/CSRF/Auth/Role/Permission middleware → Controller → Service/Model (PDO) → View/Layout → Response.

Suggested directory structure

brc-zhob/
├── app/Controllers/{Public,Auth,Admin,Teacher,Cadet,Parent}/
├── app/Core/{Router,Database,View,Session,Csrf,Validator,Response}.php
├── app/Middleware/{Auth,Role,Permission,Csrf}Middleware.php
├── app/Models/ and app/Services/
├── app/Views/{layouts,components,public,auth,admin,teacher,cadet,parent}/
├── config/ ├── database/ ├── routes/
├── public/{index.php,.htaccess,assets/}
├── storage/{private_uploads,logs,exports,backups}/
├── scripts/ ├── tests/
├── .env.example ├── .gitignore └── README.md

Do not switch to React, Next.js, Node-only or Firebase. The owner selected PHP + MySQL on XAMPP.

4. COMPLETE PAGE & ROUTE MAP

Use clean lowercase routes and named route helpers. Do not scatter hard-coded URLs. Every listed route must render a real page or a working action; no dead menu items.

Public website

Page	Canonical route	Access
Home	/	Guest
About Us	/about	Guest
Principal Profile	/about/principal	Guest
Vision & Mission	/about/vision-mission	Guest
History	/about/history	Guest
Achievements	/about/achievements	Guest
Academics	/academics	Guest
Faculty directory/profile	/faculty ; /faculty/{slug}	Guest
Hostel Life	/hostel-life	Guest
Results/search/detail	/results ; /results/search ; /results/{public-token}	Guest, limited published data
Gallery / album	/gallery ; /gallery/{album-slug}	Guest
Notices / detail	/notices ; /notices/{slug}	Guest
Contact Us	/contact	Guest
Alumni Registration	/alumni/register	Guest
Admission wizard / tracking	/admissions/apply ; /admissions/track	Guest / own application token
Login / forgot/reset	/login ; /forgot-password ; /reset-password/{token}	Guest
Privacy / terms	/privacy ; /terms	Guest

Admin portal

/admin/dashboard, /admin/admissions, /admin/alumni, /admin/cadets, /admin/parents, /admin/staff, /admin/departments, /admin/academics/classes, /admin/academics/sections, /admin/academics/subjects, /admin/academics/timetable, /admin/academics/teacher-assignments, /admin/attendance, /admin/attendance/reports, /admin/assignments, /admin/exams, /admin/exam-duties, /admin/results, /admin/grading-scales, /admin/report-cards, /admin/hostels, /admin/hostels/rooms, /admin/hostels/allocations, /admin/fees, /admin/fees/invoices, /admin/fees/payments, /admin/notices, /admin/gallery, /admin/gallery/albums, /admin/content/pages, /admin/content/homepage, /admin/reports, /admin/users, /admin/roles, /admin/permissions, /admin/notifications, /admin/audit-log, /admin/backups, /admin/settings.

Teacher portal

/teacher/dashboard, /teacher/classes, /teacher/classes/{id}, /teacher/students, /teacher/timetable, /teacher/attendance, /teacher/assignments, /teacher/submissions, /teacher/exams/duties, /teacher/results, /teacher/hostel-remarks, /teacher/notices, /teacher/messages, /teacher/profile.

4. COMPLETE PAGE & ROUTE MAP - PORTALS CONTINUED

Cadet portal

/cadet/dashboard, /cadet/profile, /cadet/classes, /cadet/timetable, /cadet/assignments, /cadet/submissions, /cadet/attendance, /cadet/results, /cadet/report-card, /cadet/fees, /cadet/hostel, /cadet/notices, /cadet/notifications, /cadet/settings.

Parent portal

/parent/dashboard, /parent/children, /parent/children/{id}, /parent/attendance, /parent/results, /parent/report-cards, /parent/fees, /parent/leave-applications, /parent/hostel, /parent/messages, /parent/notices, /parent/notifications, /parent/profile.

5. ROLES, PERMISSIONS & PRIVATE DATA

Role	Allowed access	Never allowed by default
Guest	Public pages; admission, alumni and contact forms; own application tracking with reference + secure token.	Private student/staff records, portal dashboards, unpublished notices.
Admin / Super Admin	Manage records, content and workflows according to permissions; Super Admin manages roles and system config.	No uncontrolled destructive action; sensitive changes must be audited.
Teacher	Assigned classes/subjects, students in those classes, timetable, attendance, assignments, exam duties and authorized marks.	User role changes, finance configuration, unassigned classes, unrelated private records.
Cadet	Own profile, classes, timetable, assignments, attendance, published results, fees, approved hostel info.	Other cadets records; editing marks, attendance, fees or hostel allocation.
Parent	Only linked and verified children: attendance, published results, fees, approved hostel details, leave requests and messages.	Any child not linked/verified to that parent.
Alumni applicant/member	Submit registration; approved alumni features only if BRC enables them.	Public exposure of CNIC, DOB, address and personal phone.

Mandatory login behavior

- Opening / must show public Home without requiring login.
- Login is optional; public website links stay accessible while signed in.
- After authentication, server role determines redirect: Admin → /admin/dashboard; Teacher → /teacher/dashboard; Cadet → /cadet/dashboard; Parent → /parent/dashboard.
- No public self-service role selection or open Admin/Teacher/Cadet/Parent account creation. Admin provisions accounts; applicant/admission and alumni public forms are separate.

Every private request must recheck role, permission and record ownership on the server. Hiding a menu item is not security.

6. HOW THE SYSTEM WORKS - CORE WORKFLOWS

A. Public visitor

Visitor opens the homepage → browses public pages → sees only published notices, programs, faculty, gallery albums and CMS content → may apply online, register as an alumnus or contact the college without becoming an existing portal user.

B. Login and role redirect

User submits username/email + password → server validates and rate-limits → password_verify checks stored hash → session ID is regenerated → login event is logged → server redirects based on stored DB role → every subsequent protected request revalidates session, role, permission and record ownership → logout invalidates the session server-side. Password reset uses single-use expiring tokens.

C. Online admission

Guest opens Apply Now → wizard stages: Personal Info → Academic Info → Contact → Fee → Review/Submit → secure server-side draft → validate each step → securely upload files → create unique non-sequential application reference and status history → applicant gets confirmation/tracking token → admin reviews documents and manually verifies fee deposit → admin approves/rejects with reason and audit log → approved application is converted into a cadet exactly once, inside a database transaction.

Academic Information fields from user-provided screenshot

Name of candidate (according to school record); Father's Name (according to school record); Class in which studying; Medium of Instruction; Date of Birth according to school record (in figures); Date of Birth (in words); Performance rated as % in previous exam; expected annual examination class; securing more than % marks; Name of School in which studying. Preserve the DOB alteration warning, with final wording confirmed by BRC.

Fee Payment fields from user-provided screenshot

Deposit Slip No; Date of Deposit; Bank Name & Branch; Account No; Amount (PKR); Attach Deposit Slip (PDF/JPG, maximum 2 MB). Fee is non-refundable notice. Real fee amount, bank account, branch, application dates and any additional steps must be supplied by BRC; never invent them.

Personal/Contact steps

The screenshots supplied do not establish a complete official Personal Info and Contact field list. Make these steps configurable and mark all proposed mandatory fields for BRC confirmation; do not silently invent required data.

7. ALUMNI, ACADEMICS, RESULTS, FEES & CONTENT

Alumni registration

Exact visible fields: Full Name; Kit No (BRZ-XXXX); Entry No (1-9); Wing (shown options Jinnah, Iqbal, Liaquat, Fatima - verify list); Passing Year; Date of Birth; CNIC; Phone; Email; Current City; Current Designation; Organization; Address; Profession (Doctor, Engineer, Teacher, Army, Police, Business, Other); Organization Name; LinkedIn Profile; Post BRC Education Institution; About Me; profile image upload. Contributions: Guest Speaker, Chief Guest, Mentor, Sponsor a Cadet, Job Referral, Donation, None. “None” is mutually exclusive. Submit with code-of-conduct/privacy acknowledgement. Submission stays pending until admin review. Sensitive data remains private.

Teacher / Cadet / Parent academic workflow

Admin configures academic year, classes, sections, subjects and teacher assignments. Teachers see only assigned records; mark attendance once per session; create assignments and grade submissions; Admin schedules examinations and duties; teacher marks are validated and submitted for review; only published results are visible to cadets and linked parents.

Results publishing

Exam and subject schedules are configured → authorized teachers enter subject marks → server validates numeric values against max marks → Admin reviews/locks/publishes → cadet and linked parent see own published result/report card → public result lookup exposes only approved fields and uses anti-enumeration protections. Report cards use verified branding and calculated totals/grades.

Fees

Admin configures real fee heads and invoices → applicant/parent uploads evidence → payment remains PENDING_VERIFICATION → authorized finance admin checks bank evidence and marks verified/rejected with actor/time/audit record. Uploading a slip never automatically means paid. Payment gateway only if a real provider and credentials are later configured.

Notices, Gallery and CMS

Admin creates notices with category, publish date, expiry, audience and optional attachments; public users see only published public notices. Admin creates gallery albums and adds optimized photos, captions and alt text. Website content is managed through permission-gated CMS fields; never permit arbitrary PHP/HTML execution from CMS.

8. DATABASE DESIGN

Database name: brc_zhob_db. Use one central relational database for all modules, InnoDB and utf8mb4. The separate SQL file contains the baseline schema and must be reviewed and extended to support every implemented route.

Group	Expected tables / entities
Users & security	roles, permissions, role_permissions, users, password_reset_tokens, login_attempts, audit_logs, notifications
Cadets & guardians	cadets, guardians, parent_profiles, cadet_guardians
Staff & academics	staff_profiles, departments, academic_years, classes, sections, subjects, class_subjects, teacher_assignments, timetable_entries
Attendance & assignments	attendance_sessions, attendance_records, assignments, assignment_submissions
Exams & results	exams, exam_subjects, exam_duties, exam_marks, grading_scales, report-card aggregation service/results
Hostel & finance	hostel_blocks, hostel_rooms, hostel_allocations, warden_remarks, fee_structures, fee_invoices, fee_invoice_items, fee_payments
Admissions & alumni	admission_applications, admission_documents, admission_fee_details, application_status_history, alumni_profiles, alumni_contributions
Public site & comms	notices, notice_attachments, gallery_albums, gallery_images, content_pages, site_settings, messages, leave_applications
Operations	file metadata (if unified), backup records, migrations, system_settings

Required database engineering

- Add migrations, foreign keys, indexes and unique constraints that match confirmed BRC policies.
- Add exam result/report-card aggregation rules and timetable tables; schema baseline may require extensions.
- Use transactions for admission submit/approval, cadet account creation, attendance batches, payment verification and result publishing.
- Do not put mockup names, counts, fees, dates or fake marks into production seed data. Demo data must be clearly marked fictional and kept out of public outputs.
- Never use root DB credentials for production; use least-privilege database user.

9. SECURITY, PRIVACY & RELIABILITY

- Passwords: PHP password_hash(PASSWORD_DEFAULT) and password_verify; rehash when needed; never plaintext.
- Sessions: strict mode, ID regeneration after login, HttpOnly, SameSite, Secure cookies in HTTPS, inactivity timeout and server-side logout.
- Authorization: role + permission + record ownership checks on every private route.
- SQL: PDO prepared statements only; no SQL string concatenation with user input.
- XSS/CSRF: context-appropriate output escaping; CSRF token on every state-changing form/AJAX action.
- Rate-limit login, password reset, admission tracking and public forms; avoid account enumeration.
- Uploads: verify extension, MIME and file signature; random filenames; enforce size; reject executable/HTML/PHP; store outside public web root; authorized downloads only.
- Admission deposit slip: PDF/JPG max 2 MB, enforced on client and server. Keep private.
- Sensitive data minimization: CNIC, DOB, address, guardian phone, marks, fees, hostel records and deposit slips are private.
- Public results lookup must not enumerate students; require adequate identifiers and show only approved published fields.
- Audit: log sensitive actions, actor, entity, timestamp and change summary; never log passwords or session tokens.
- Backups: restrict access, rotate, encrypt where possible, and verify restore on a test copy.
- Production: HTTPS, secrets outside web root, debug off, setup installer disabled, directory listing off and security headers.

Do not add live GPS, biometrics, payment gateways or Google OAuth unless BRC specifically approves and credentials/consent are configured. Hide incomplete integrations; do not fake success.

10. XAMPP SETUP & IMPLEMENTATION PLAN

Local development steps

- Install XAMPP and start Apache + MySQL in the XAMPP Control Panel.
- Place the generated source project at C:\xampp\htdocs\brc-zhob\ (or document actual installation path).
- Create/import brc_zhob_db using phpMyAdmin or the safe installer.
- Configure DB settings using a safe local config file copied from .env.example; never commit credentials.
- Set Apache document root to the project public/ directory, or document the local fallback URL.
- Use a one-time installer or CLI to create Super Admin with a strong unique password; no preset password.
- Test all four roles with separate accounts and sample-only data.

Online deployment later

Use hosting compatible with the actual PHP baseline; point domain document root to public/; set secure secrets; use restricted DB account; enable HTTPS; move private uploads/backups outside web root; disable setup/debug; migrate with tested migrations; keep local and online databases separate.

Implementation phases

Phase	Work
0	Inspect environment, confirm versions, plan routes/components and create checklist.
1	Foundation: front controller, router, PDO, schema/migrations, sessions, CSRF, validation, RBAC and secure installer.
2	Public site, CMS, notices, gallery, staff/program content and policies.
3	Online admission wizard, secure documents, tracking, alumni registration and admin reviews.
4	Authentication, password reset, account lifecycle and role routing.
5	Admin modules: cadets, guardians, staff, academics, attendance, exams, results, hostels, fees, content and reporting.
6	Teacher portal and assigned academic tasks.
7	Cadet portal and student self-service.
8	Parent portal and verified child linking.
9-10	PDF reports/receipts, notifications, exports, backups, responsive QA, security QA and deployment docs.

11. ACCEPTANCE TESTS - DEFINITION OF DONE

Do not claim “100% complete” until each applicable test has a recorded pass result or a clearly explained blocker.

Public website

• Root URL shows Home without login; all public navigation/footer links work; published CMS content appears while drafts/private data stay hidden.

• Search/filter/pagination work; contact form validates and stores messages; no fake delivery confirmation.

Authentication & permissions

• Admin, Teacher, Cadet and Parent are redirected to the correct portal. Disabled users are blocked. Guest cannot access private pages.

• Teacher cannot access unassigned classes; cadet cannot change ID to see another cadet; parent cannot see unlinked cadets; non-admin cannot change roles.

• CSRF, session rotation, password hashing and login rate limits are tested.

Admissions & alumni

• Apply is public; academic and fee labels match the source screenshots; fee slip max 2 MB PDF/JPG enforced server-side; files stored privately.

• Admission reference is unique; status history works; manual fee review and approval/rejection are audited; approved conversion does not duplicate cadets.

• Alumni fields match source; duplicate checks work; None is mutually exclusive; approval required; personal fields private.

Academics, exams, hostel & finance

• Teacher assignments, attendance uniqueness, assignments, grading, exam duties, mark limits and published-result visibility all work.

• Invoices/payments link to correct person; upload does not mark payment paid; hostel room capacity cannot be exceeded.

Quality & deployment

• Dashboard metrics are database-derived; CMS controls notices/gallery/content; sensitive changes audited; backup restore tested.

• No PHP warnings/fatal errors, JS console errors, dead buttons or placeholder-only modules. All forms validate and are accessible.

• No horizontal overflow at 1440/1024/768/390/360 px; XAMPP setup steps are executed on the target PC.

12. CONTENT SOURCE OF TRUTH & OWNER CONFIRMATIONS

The generated mockups may contain sample names, portraits, contact details, counters, student totals, staff counts, hostel capacities, program details, success rates, dates, exam records, fee values, bank details, notices or other illustrative copy. Never treat these as official BRC facts. Keep content editable through database/CMS and mark seed examples as DEMO.

BRC must provide/confirm before production

- Official logo variant, official address, contact phone, email, website and social profile URLs.
- Principal name/title/photo/message and permission to publish staff portraits and biographies.
- Verified staff directory, qualifications, designations, departments and public visibility permissions.
- Approved academic programs, subject combinations, admission eligibility, class list, medium options and complete personal/contact fields.
- Real admission fee amount, bank name/branch/account instructions, fee schedule and opening/closing dates.
- Hostel policy, capacity, room sharing, facilities, security and warden contact.
- Result publication policy, grade rules, exam calendar, public result lookup policy and report card format.
- Current official notices, actual statistics, licensed/consented campus photos, privacy policy and alumni code of conduct.

Critical field instructions

Alumni field list must match the original registration reference. Admission Academic Info and Fee Payment steps must match supplied screenshots. Do not invent mandatory personal/contact fields absent from source screenshots; make them configurable for BRC confirmation. Do not claim bank-slip upload verifies payment.

Final output required from coding agent

Complete PHP project folder; SQL schema and migrations; safe configuration template; .gitignore; secure one-time Super Admin setup; all controllers/services/views/routes/assets; README with exact XAMPP steps; test checklist with pass/fail; known limitations and remaining BRC-confirmation content. No final ZIP is required for this handoff; the coding agent may produce source code in its workspace.

APPROVED DESIGN REFERENCE

Homepage

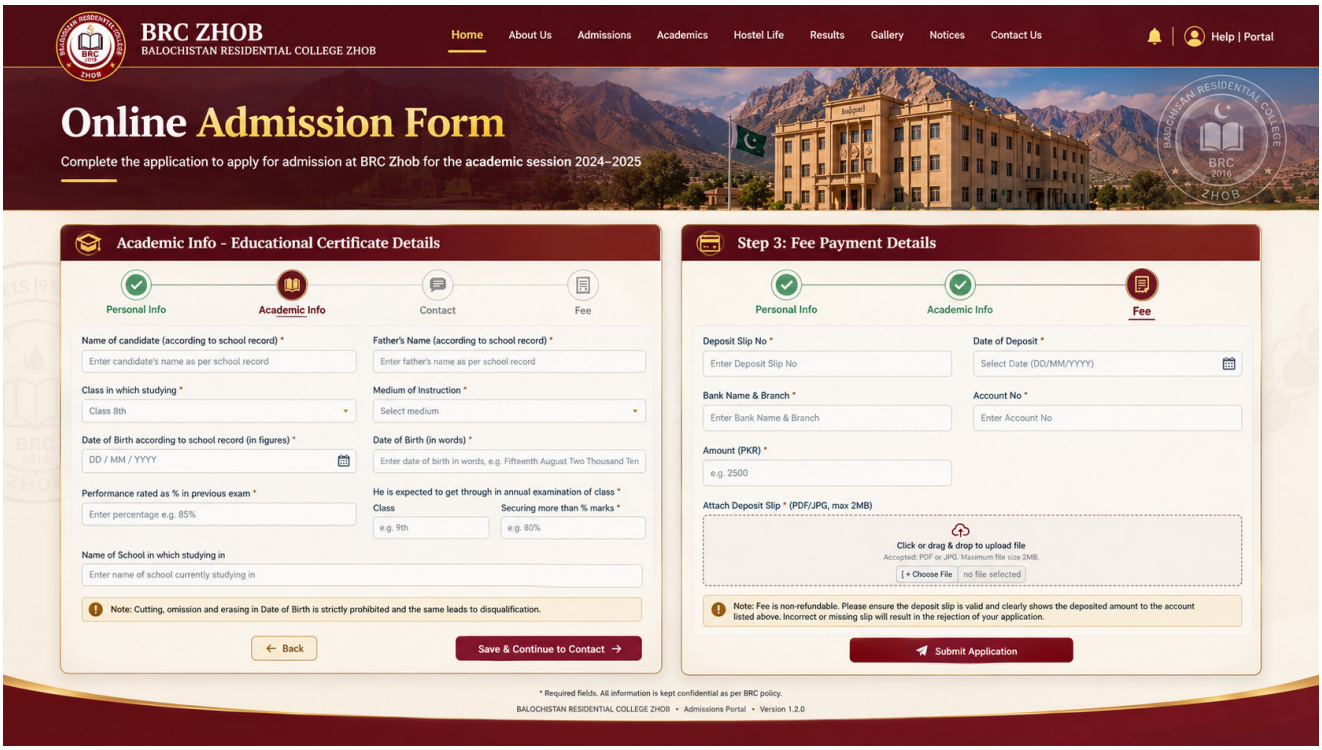

Approved visual target: header, campus hero, optional Apply Now/Virtual Tour actions, statistics, principal message, feature cards, notices ticker, latest news, gallery, quick links and footer.

APPROVED DESIGN REFERENCE

Online Admission

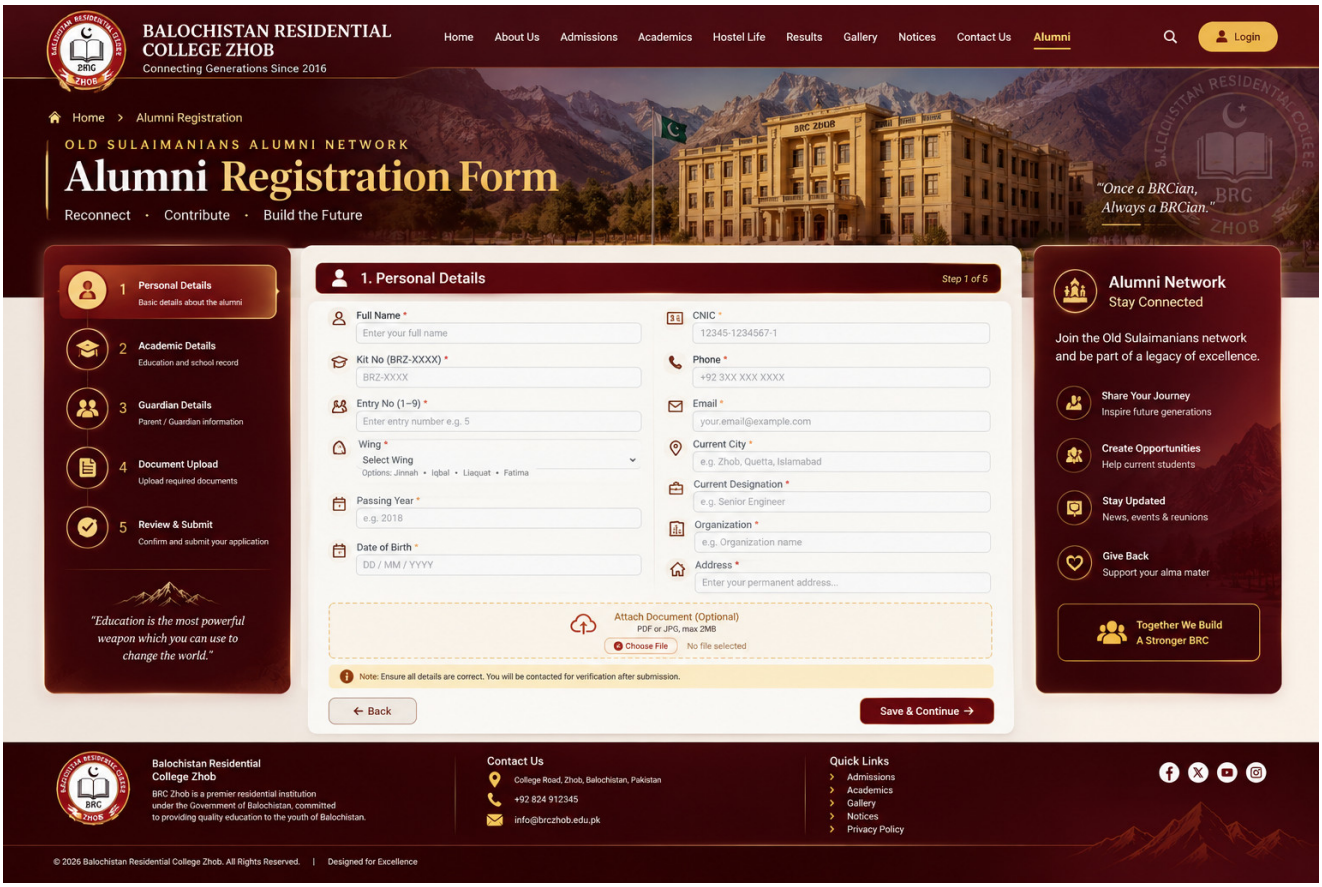

Approved two-stage visual reference: Academic Info and Fee Payment with stepper. Keep the full wizard workflow Personal Info → Academic Info → Contact → Fee → Review/Submit.

APPROVED DESIGN REFERENCE

Alumni Registration

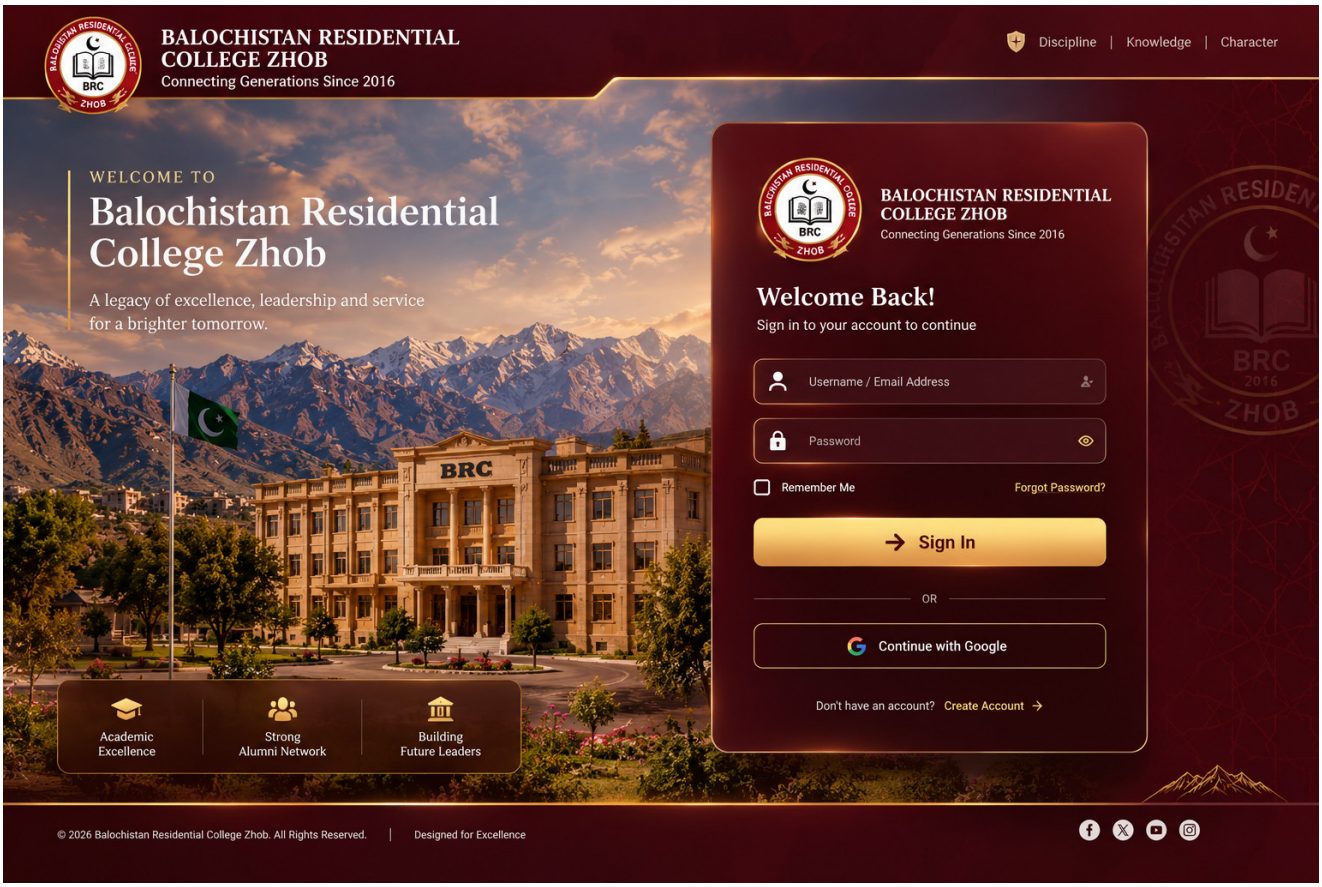

Approved alumni form visual: personal details, professional details, alumni contribution options, secure image upload and policy acknowledgement.

APPROVED DESIGN REFERENCE

Login / Sign In

Approved sign-in visual: official branding, scenic campus, username/email, password, remember-me and forgot-password. Google sign-in only if configured.

APPROVED DESIGN REFERENCE

Admin Dashboard

Approved central admin overview with KPI cards, applications table, quick actions, analytics, notices, recent alumni and gallery. Metrics must be live DB queries.

APPROVED DESIGN REFERENCE

About Us

Approved institutional story layout with Our Legacy, Vision, Mission, Values, Quick Facts, Campus Life, Our Commitment and footer.

APPROVED DESIGN REFERENCE

Principal's Profile

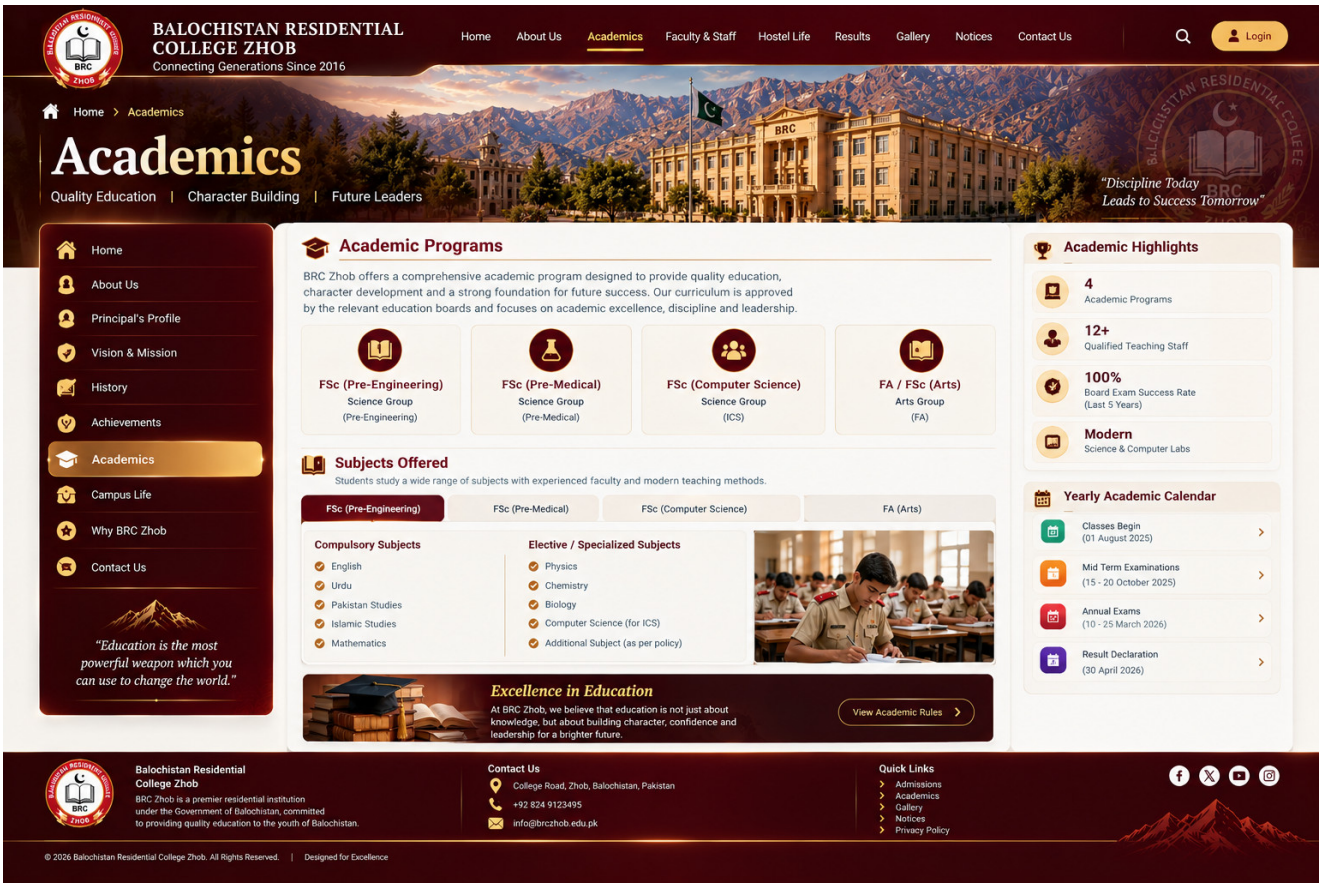

Approved principal profile with profile portrait, qualifications, experience, message, vision, key focus areas and quick facts. Replace demo identity with verified info.

APPROVED DESIGN REFERENCE

Academics

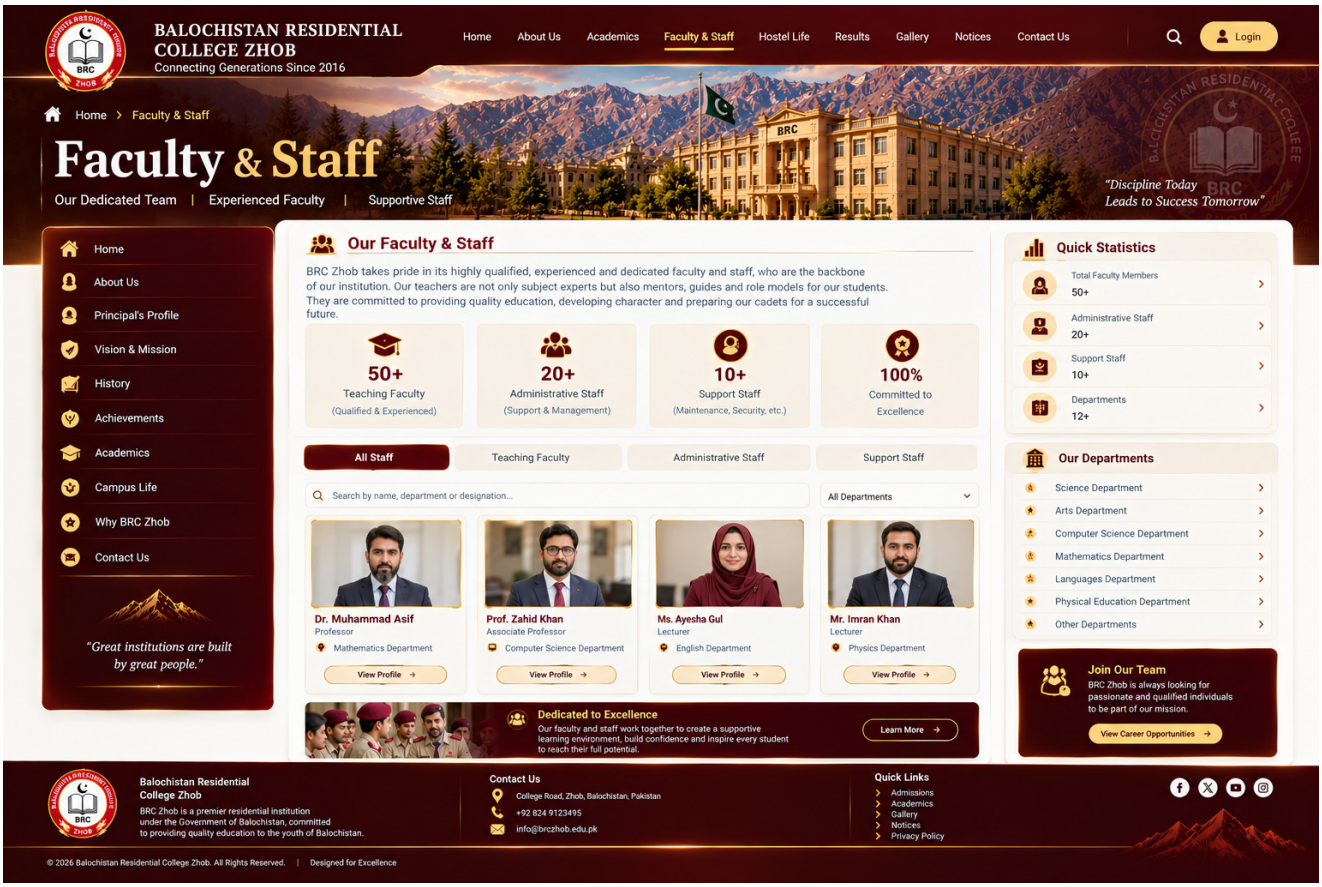

Approved programs and subject tabs, highlights, academic calendar and rules callout. Verify programs, subjects and dates with BRC.

APPROVED DESIGN REFERENCE

Faculty & Staff

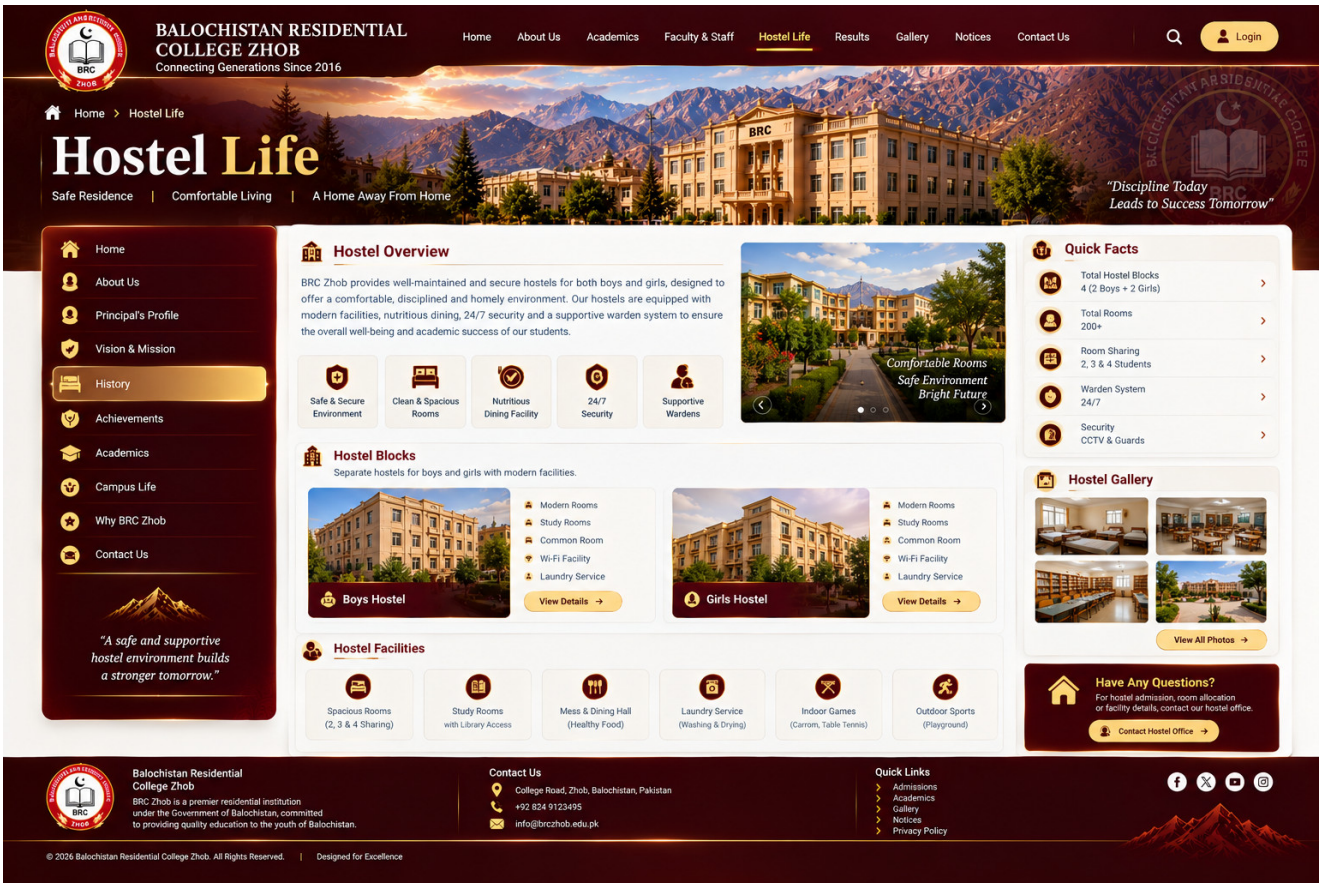

Approved directory with stats, staff category tabs, search, department filters, profiles and recruitment callout. Use verified staff data only.

APPROVED DESIGN REFERENCE

Hostel Life

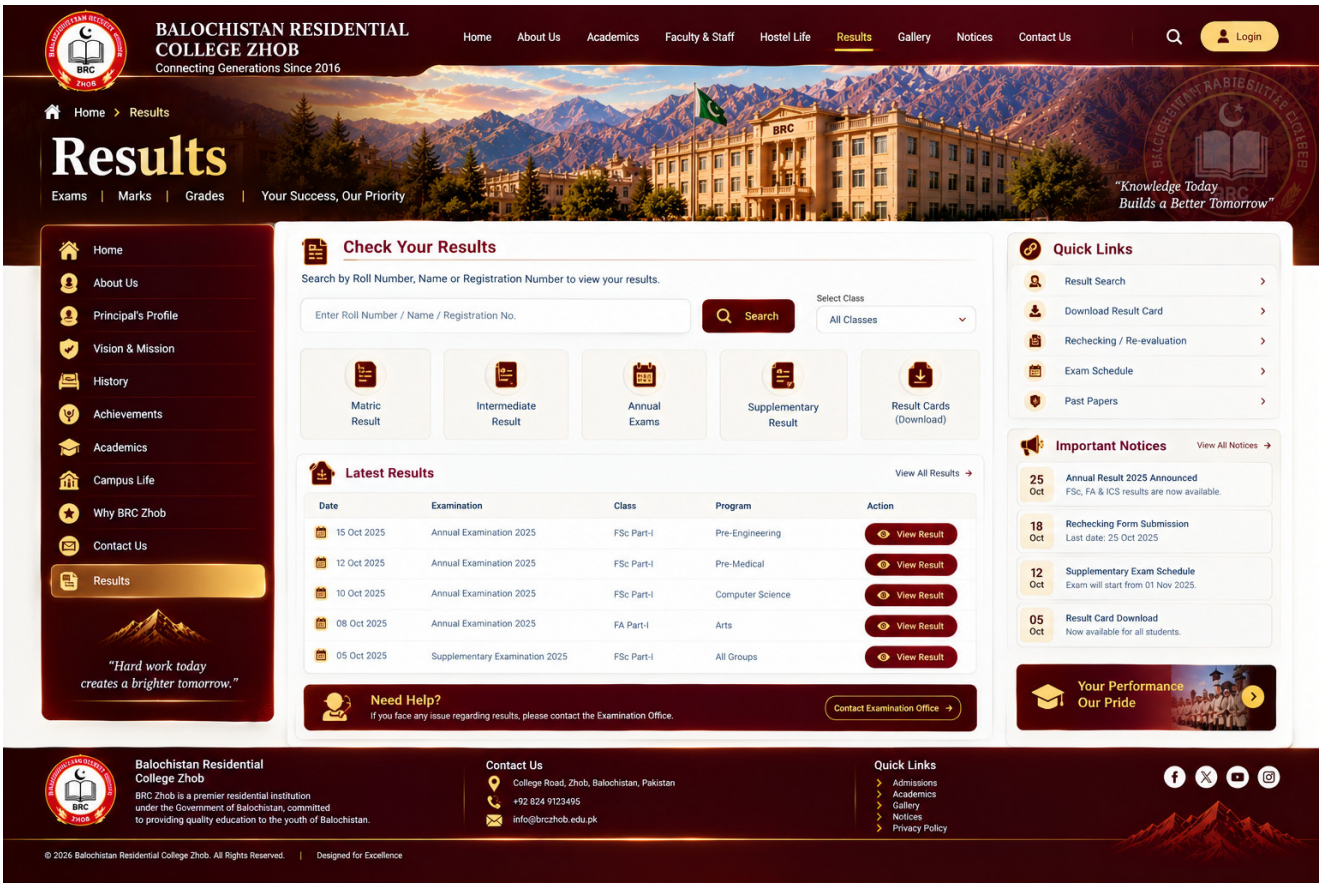

Approved hostel overview with boys/girls sections, facilities, security/warden info, quick facts and gallery. Verify policy and facilities.

APPROVED DESIGN REFERENCE

Results

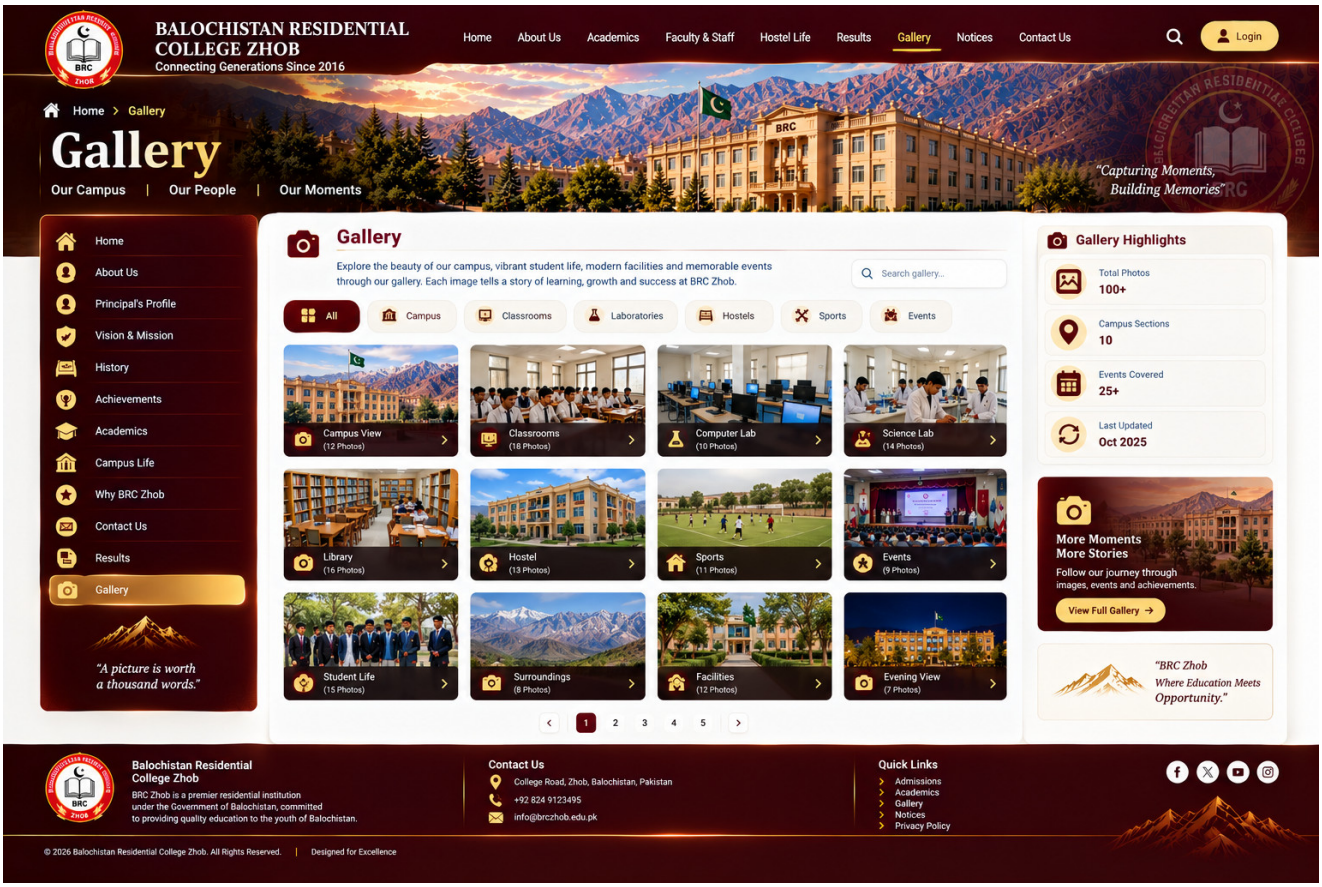

Approved result search with class selection, result categories, latest result table, quick links, rechecking, past papers, notices and help.

APPROVED DESIGN REFERENCE

Gallery

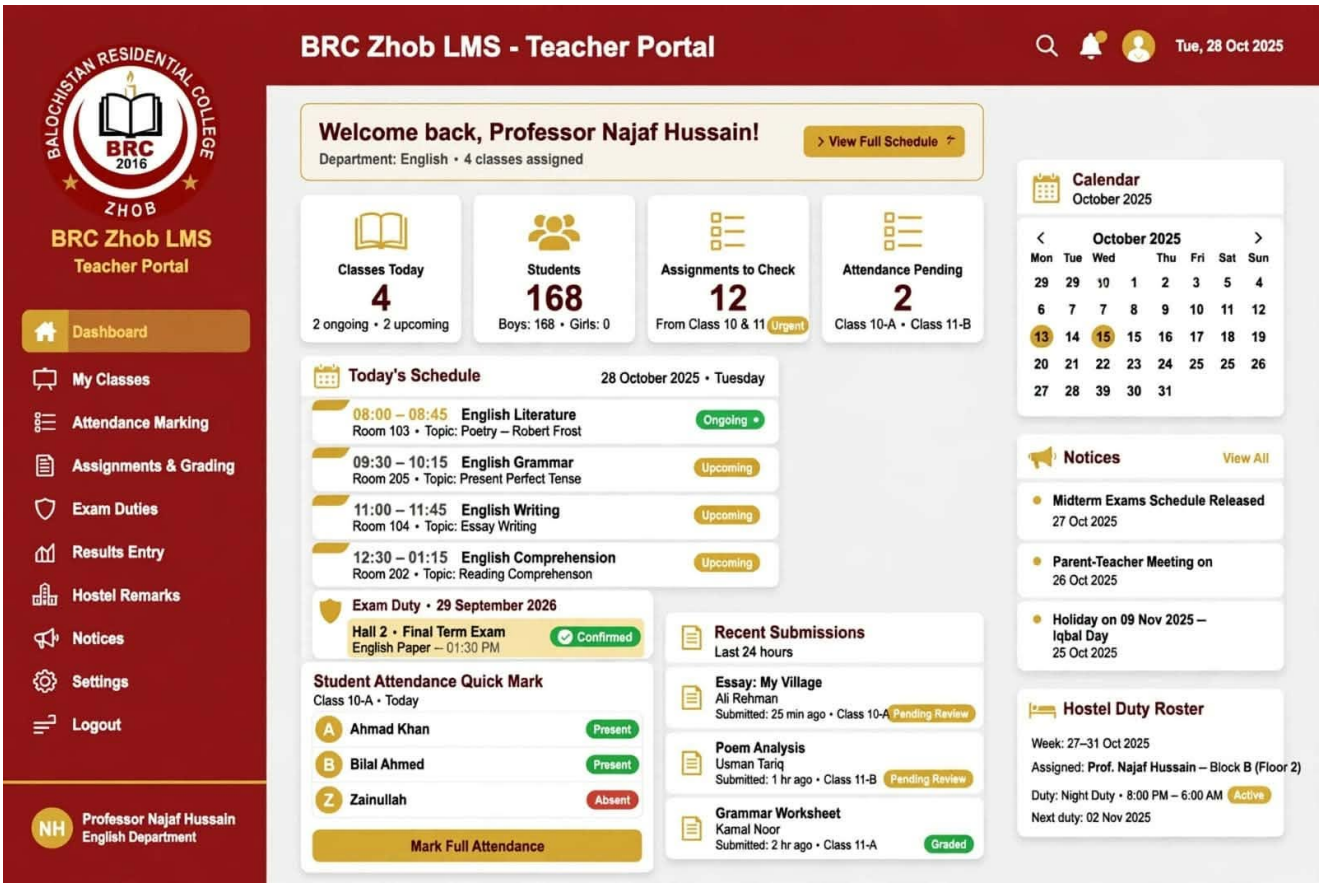

Approved gallery with search, categories, photo grid, highlights and pagination. Use authorized/consented college images.

USER-SUPPLIED SOURCE REFERENCE

Original Teacher Portal Reference

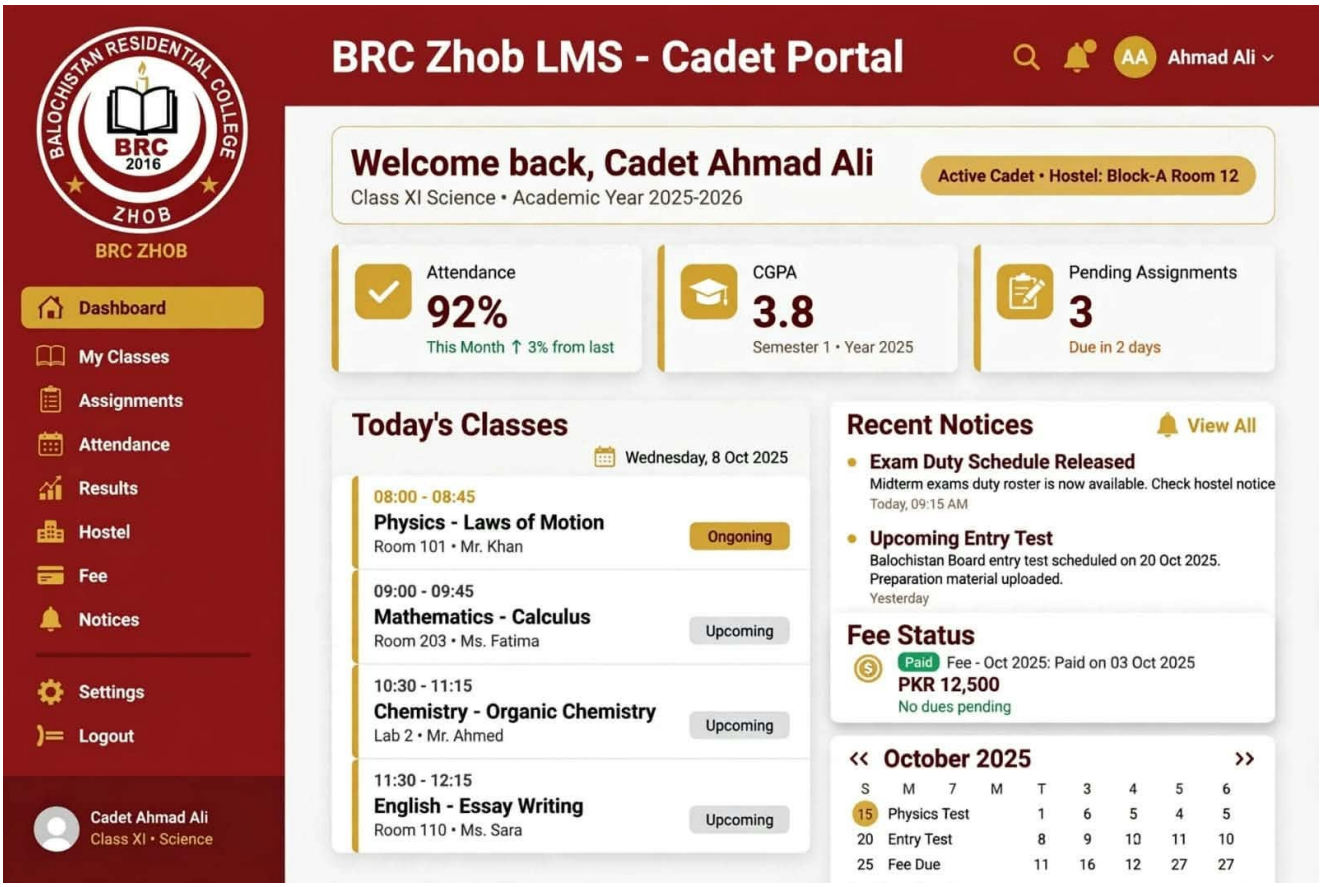

Use as source layout reference for assigned classes, attendance, assignments/grading, exam duties, results entry, notices and staff settings.

USER-SUPPLIED SOURCE REFERENCE

Original Cadet Portal Reference

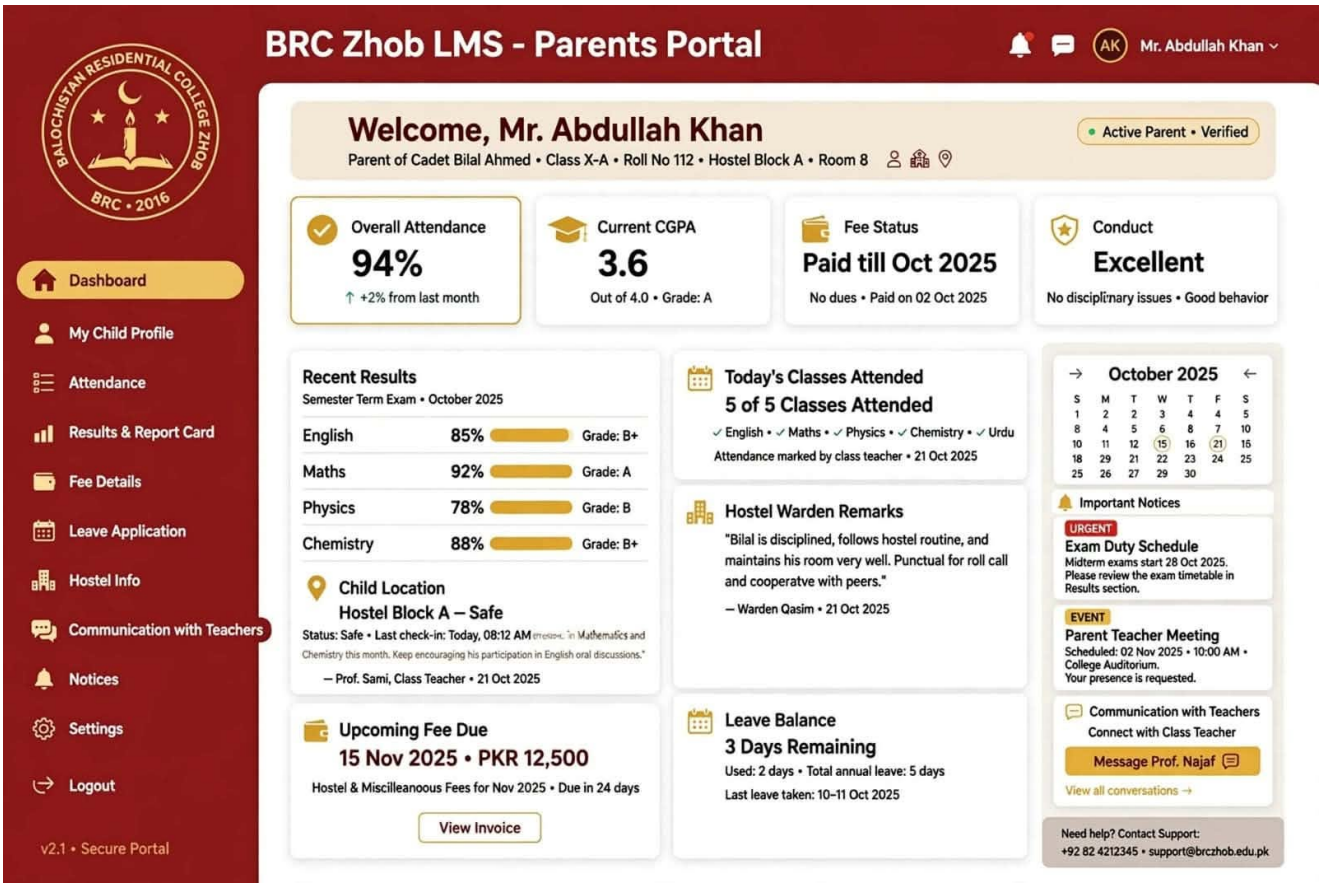

Use as source layout reference for student dashboard, timetable, assignments, attendance, results, fees, hostel and notices.

USER-SUPPLIED SOURCE REFERENCE

Original Parents Portal Reference

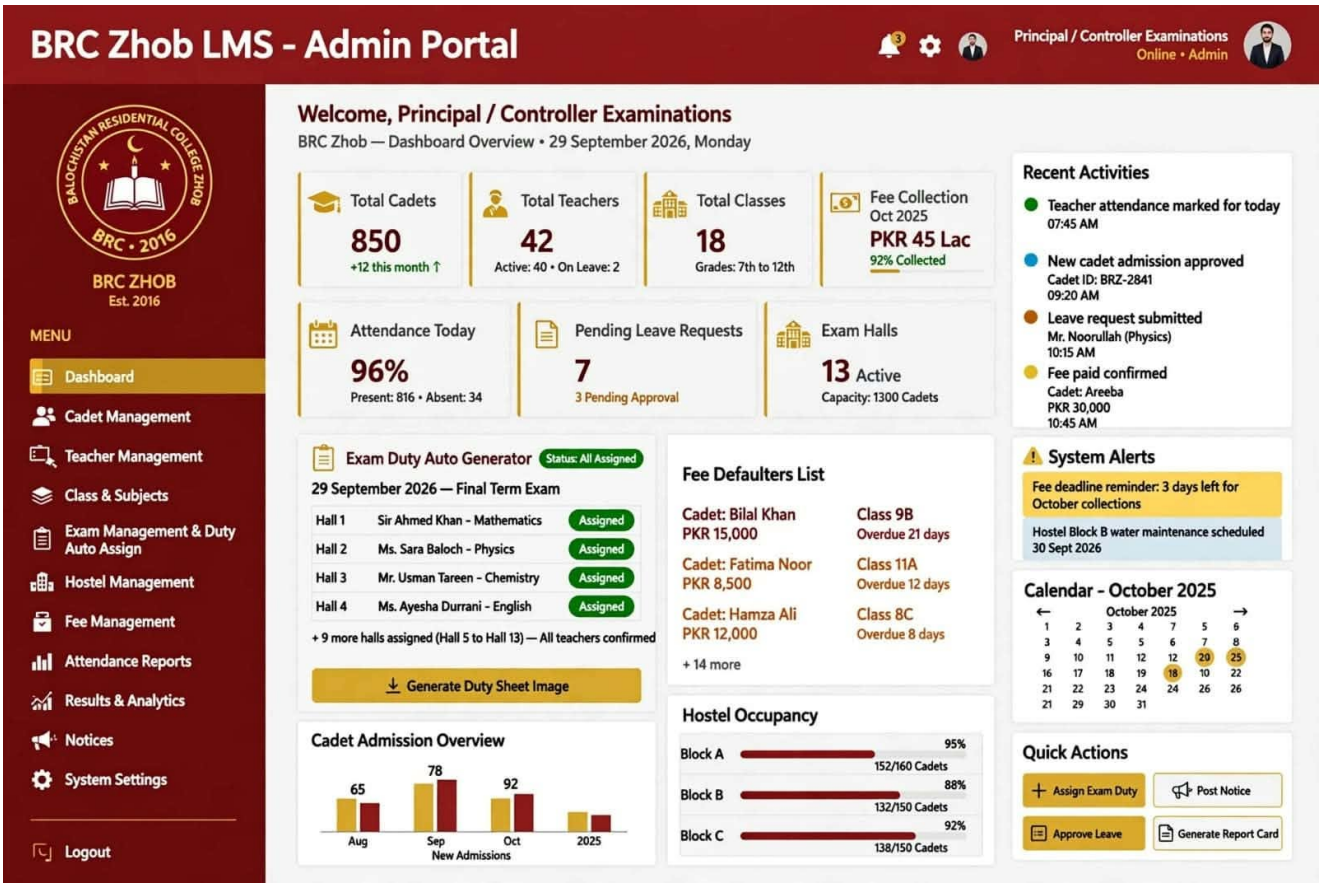

Use as source layout reference for linked child, attendance, results, fees, leave, hostel status and teacher communication.

USER-SUPPLIED SOURCE REFERENCE

Original Admin Portal Reference

Additional source reference for administration, cadet/teacher management, exams, fees, hostel, reports and quick actions.

USER-SUPPLIED SOURCE REFERENCE

Original Alumni Registration Form

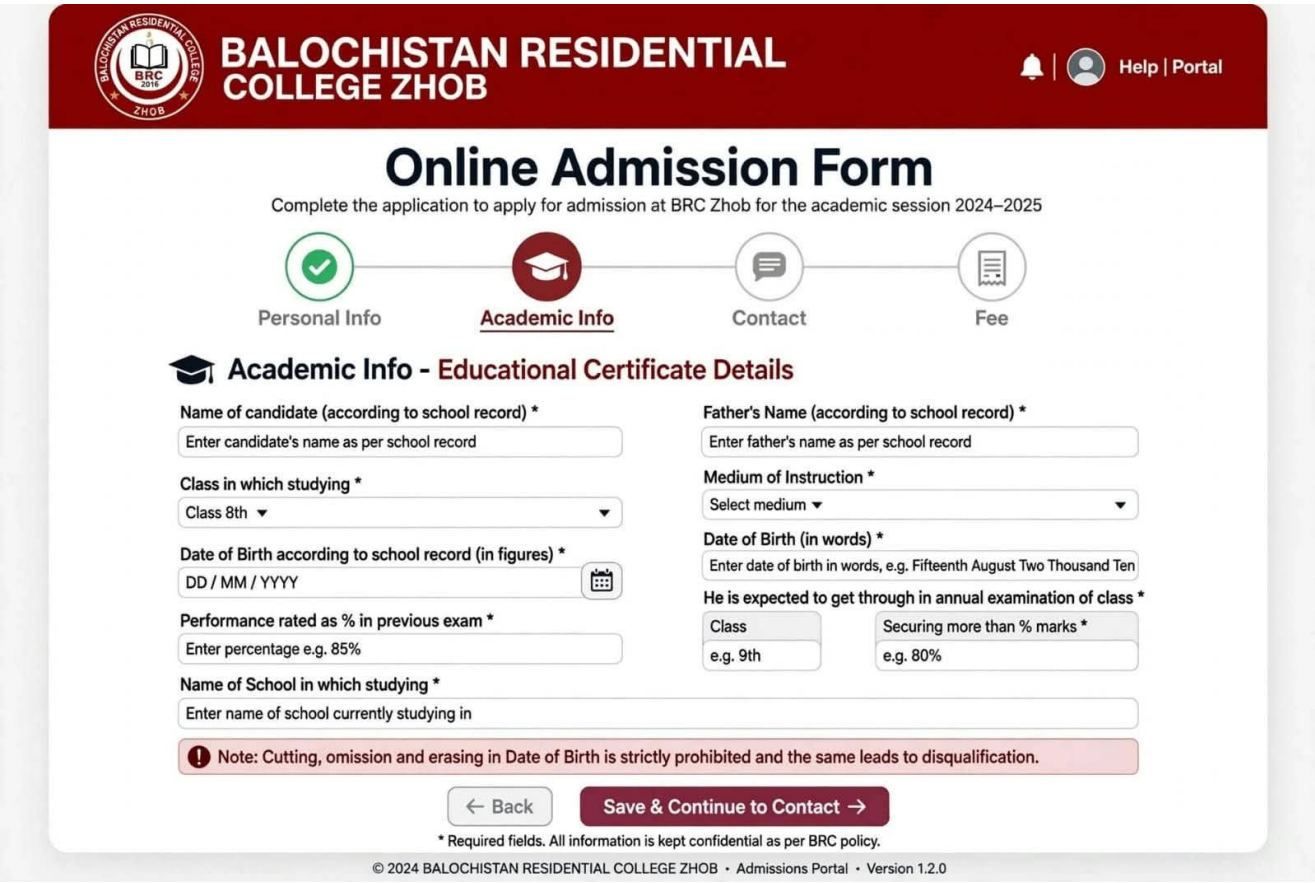

Source of truth for alumni personal details, professional details and alumni contribution selections.

USER-SUPPLIED SOURCE REFERENCE

Original Admission - Academic Info

Source of truth for the visible Academic Information labels and DOB warning.

USER-SUPPLIED SOURCE REFERENCE

Original Admission - Fee Payment

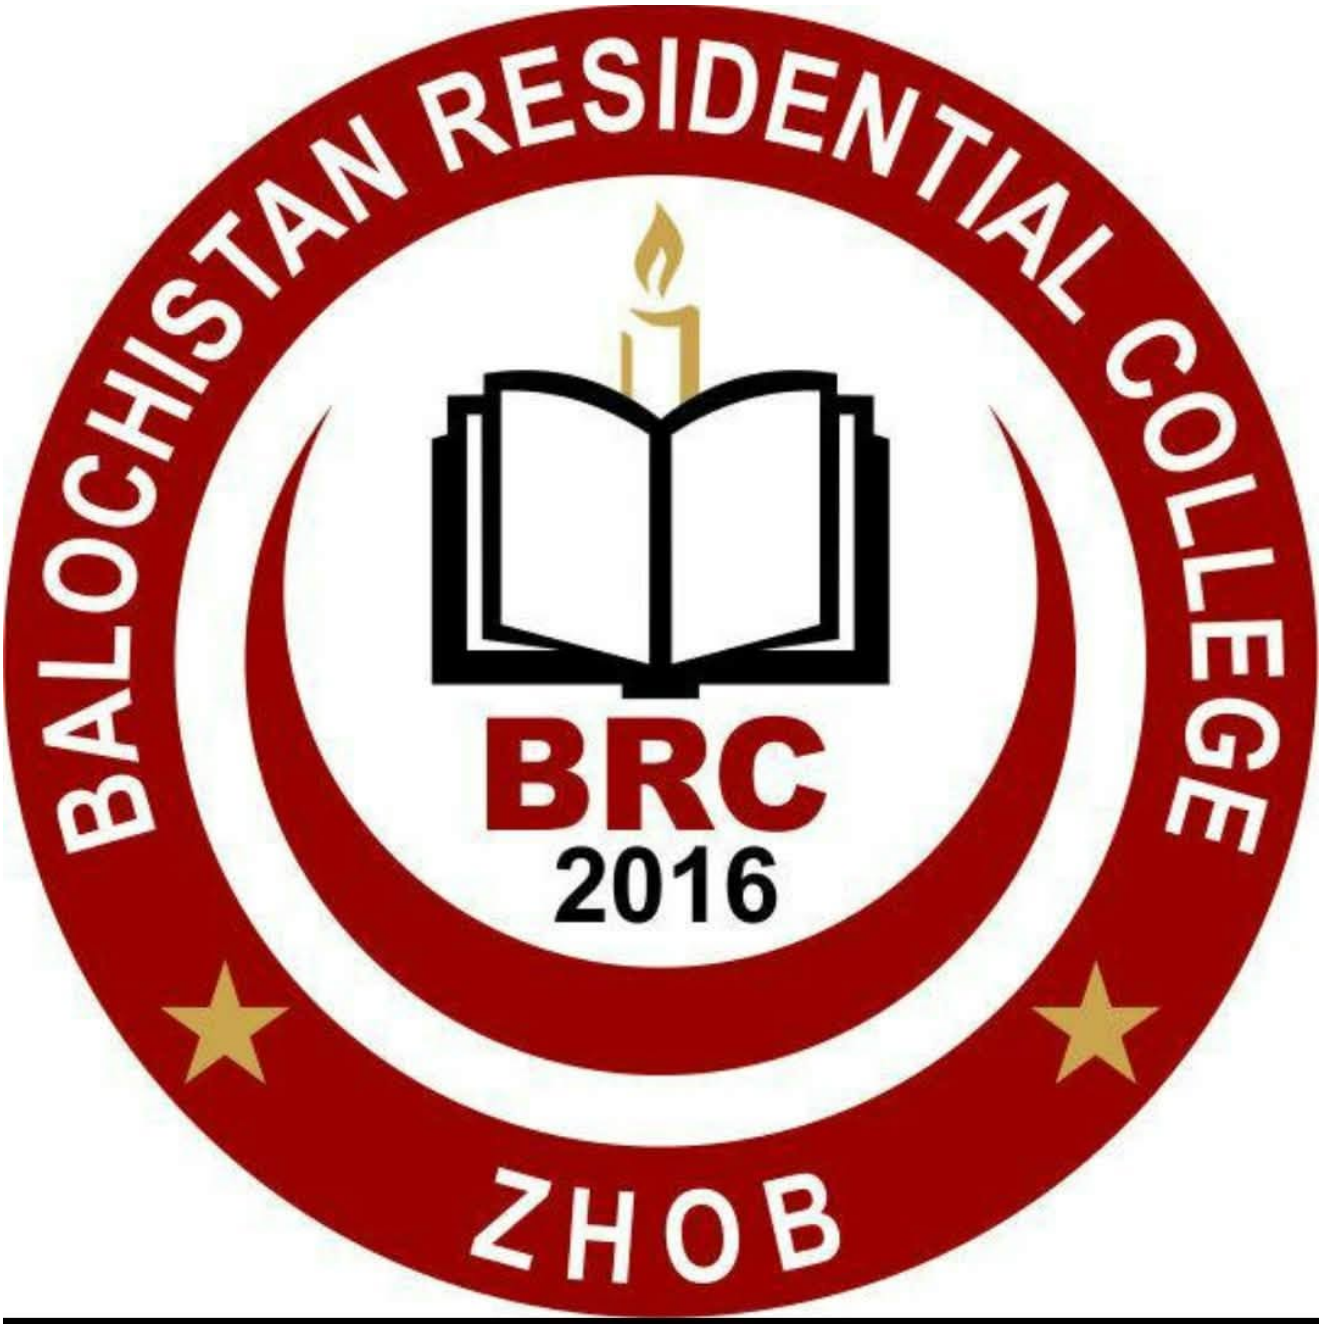

Source of truth for deposit slip number/date, bank/branch, account number, PKR amount, upload limits and warning.

USER-SUPPLIED SOURCE REFERENCE

Official BRC Logo

Use this original logo artwork unchanged in the project. The AI-created mockup marks are not substitutes for the official logo.

SUPPLEMENTARY REFERENCE ONLY

Supplementary Overview Collage

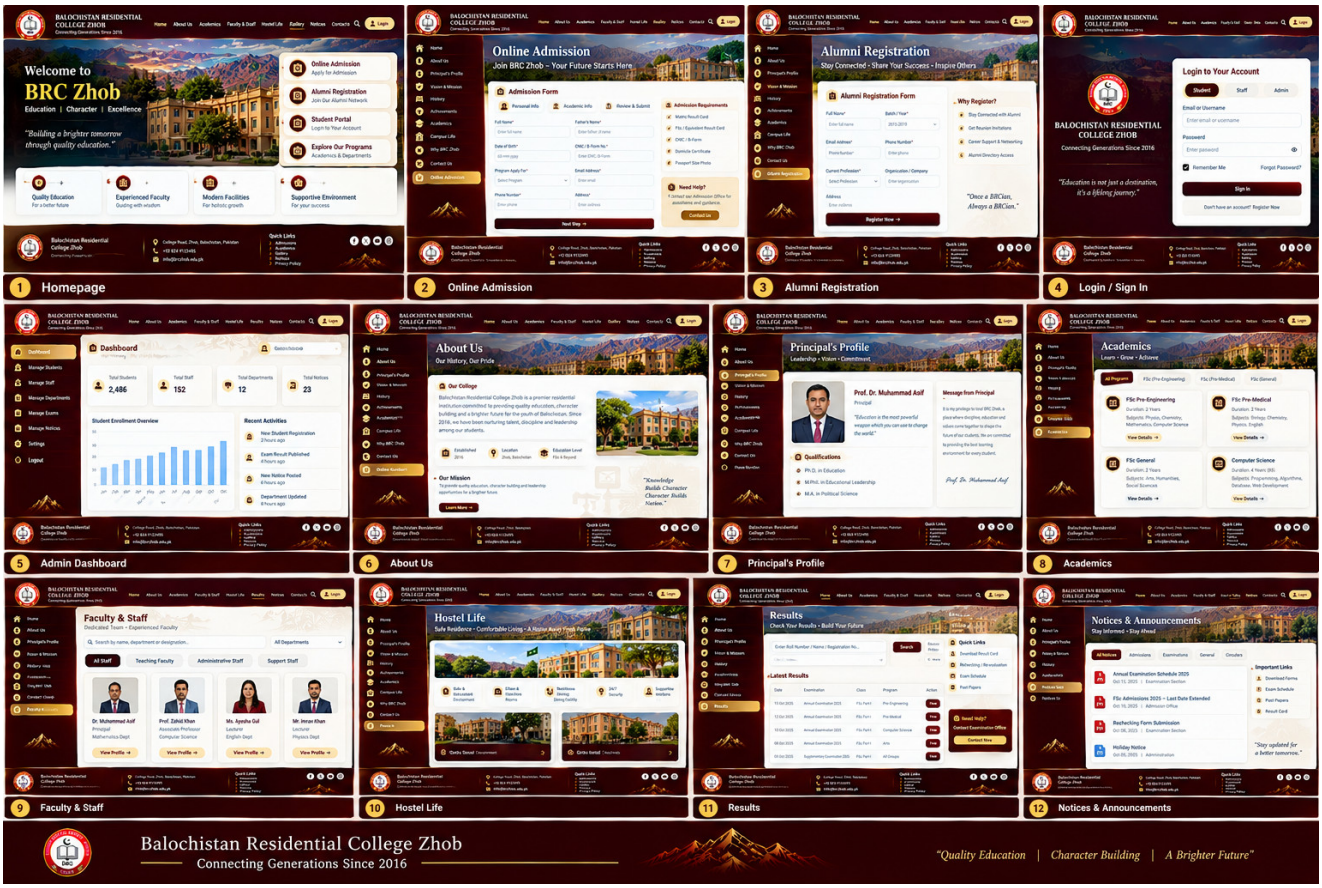

This collage is an index only. Use individual page reference images above for actual page-specific visual decisions. Do not mark unapproved or missing pages as complete because they appear in this collage.

SUPPLEMENTARY REFERENCE ONLY

Alternate Overview Collage

This collage is an index only. Use individual page reference images above for actual page-specific visual decisions. Do not mark unapproved or missing pages as complete because they appear in this collage.

END OF PROJECT BLUEPRINT

Before coding, read the attached master build prompt and SQL file. Inspect the actual XAMPP/PHP/MariaDB versions; do not assume compatibility without checking. Implement the complete specified application in phases, keep an implementation tracker, execute the acceptance tests, and report honestly what passed, failed or remains blocked.

BRC ZHOB

Knowledge • Discipline • Success
